

Swapnil Nicolson Dadel

Data Analyst — GenAI

swapnilnicolson.201@gmail.com +91-8539874570 Portfolio GitHub LinkedIn

Professional Summary

Data Analyst with hands-on experience in SQL, Python, Power BI, and Machine Learning. Experienced in designing ETL pipelines, building KPI dashboards, and analyzing structured data to deliver business insights. Passionate about combining Business Intelligence with GenAI to automate reporting and decision-making.

Technical Skills

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL (Joins, CTEs, Window Functions, Aggregations)

Databases: MySQL, SQLite, API Integration

Business Intelligence: Power BI (DAX, Power Query, Data Modeling), Tableau, Advanced Excel (Pivot Tables, Lookup Functions)

Analytics: Data Cleaning, Data Validation, Data Visualization, Exploratory Data Analysis (EDA), ETL Pipelines, KPI Development, Statistical Analysis, Regression Analysis, Classification, Predictive Analytics, Dashboard Automation

GenAI: Gemini AI, Prompt Engineering, LLM Workflows, RAG Pipelines, AI Agents (CrewAI, n8n), Streamlit

Tools: Git, GitHub, VS Code, Jupyter Notebook

Experience

Power BI Intern

Jul 2025 – Aug 2025

NullClass EdTech

Remote

- Developed four interactive Power BI dashboards tracking 12+ KPIs across 1,100+ engagement records, enabling faster campaign performance analysis.
- Implemented DAX measures and Power Query transformations, reducing manual reporting effort by 60%.
- Collaborated with business stakeholders to enhance dashboard usability and support data-driven campaign decisions.

Data Analyst Intern

Jun 2025 – Jul 2025

Zep Analytics

Remote

- Analyzed healthcare datasets from 77 U.S. cities using SQL and Python to identify operational risk trends.
- Constructed ETL workflows processing 15,000+ healthcare records with 95% reporting accuracy.
- Delivered KPI dashboards reducing reporting turnaround by approximately 40% and improving operational visibility.

Projects

Crypto Intelligence Platform — GitHub — Demo

Python, SQLite, Streamlit, Power BI, Gemini AI

- Architected a real-time cryptocurrency analytics platform using the CoinGecko API and a Bronze–Silver–Gold ETL pipeline.
- Built interactive Streamlit and Power BI dashboards monitoring 100+ live cryptocurrency records, gainers, losers, and trading volume.
- Integrated Gemini AI to generate automated summaries for 100+ live cryptocurrency records, reducing manual market analysis time.

Google Play Store Analytics — GitHub — Demo

Python, MySQL, Power BI, Machine Learning

- Constructed an end-to-end analytics pipeline for 10,000+ Google Play Store applications using SQL, Python, and Power BI.
- Developed machine learning models and feature engineering workflows to analyze application ratings and trends.
- Created interactive Power BI dashboards visualizing installs, pricing, ratings, and category performance across 10,000+ applications.

E-Commerce Advanced Analytics — GitHub

Python, SQL, Power BI, Business Analytics

- Analyzed 20,000+ e-commerce transactions to identify customer behavior and revenue trends.
- Performed cohort analysis, churn analysis, customer lifetime value (CLV), and sales funnel analysis using SQL and Python.
- Produced executive Power BI dashboards for KPI monitoring, improving business reporting efficiency across sales and customer analytics.

Education

M.Tech in Computer Science

Birla Institute of Technology, Mesra

2023 – 2025

CGPA: 7.5/10

B.Tech in Computer Science

Cambridge Institute, Ranchi

2017 – 2021

CGPA: 8.1/10

Certifications & Achievements

HackerRank SQL & Python (Intermediate) • Generative AI for Beginners (Great Learning) • 3 National & 2 International Hackathons (Devpost)
